

Instagram is a way to share our work at P2P with friends, clients, co-workers and other professionals through a series of pictures.

It's simple and it's fun!

Do I need an Instagram account? Yes, you need to set up a personal Instagram Account in order to participate. To do this, you will need to add the Instagram app to your smart phone or tablet device. Then, set up an individual account using your personal information. (Do not set it up using your p2p email address).

Okay, I have set up my account. Now what do I do?

- 1) Log into your personal Instagram account
- 2) Click the circle inside the square button located at the bottom of the screen.
- 3) Take the photos
- 4) Click the bottom left button and select the image you want to share, click next.
- 5) (Optional) Edit the visual effects
- 6) Write a brief caption
- 7) Tag P2P by typing @socialp2p #weluvp2p
- 8) Press the share button.

@socialp2p #weluvp2p

What types of photos should I be taking for @socialp2p?

Fun ones! We want to show all the involvement that P2P has with people and places across Georgia and the United States. You can take photos of everything from the local resource fair in Dublin or Dunwoody to the statewide meetings of the DOE State Advisory Panel, Disability Day at the Capitol, or the Babies Can't Wait SICC. If you are attending a workshop, training, or meeting, snap some photos! Trainers can ask someone in the audience to snap a photo during your presentation. Be creative, have fun and remember, everyone loves a selfie!

I don't have a smart phone or tablet device. Can I still play?

Yes. If you are at an event and have a great picture that you want on Instagram, you can email it to me and I can post it. Email to karen@p2pga.org and be sure to include a caption.
